

Developing Efficient Traffic Safety Law Enforcement Programmes in Rapidly Developing Countries

George Yannis, Professor

Stergios Mavromatis, Assistant Professor

Alexandra Laiou, Research Associate

Department of Transportation Planning and Engineering
National Technical University of Athens, Athens, Greece

Objectives - Methodology

Objectives

- Identify key elements of the traffic enforcement system to improve road safety.
- Develop a framework of principles and proposals for selected enforcement programs, with focus on rapidly developing countries.

Methodology

- Exploit international experience.
- Map current enforcement practices.
- Evaluate and prioritize enforcement activities.

Enforcement of Seat Belt Use Worldwide

- Enforcement in combination with efficient informational and public awareness campaigns.
- Mild and continuous enforcement following in time the messages of the awareness campaign.
- Impose seatbelt use through relevant incentives.
- Utilization of warning devices inside the vehicle.

Enforcement of Drink Driving Worldwide

- Systematic enforcement of the legal blood-alcohol concentration limits.
- Inform drivers on relevant Traffic Police actions.
- Implementation of informational campaigns.
- Promotion of alcohol consumption avoidance before driving.
- Increase of the perceived probability for detecting offenders through the implementation of programmes including:
 - ✓ large number of controls
 - ✓ unpredictable controls in terms of time and location
 - ✓ visible enforcement

Enforcement of Speeding Worldwide

- Increase the perceived probability for detecting offenders
- Use of fixed means at evident locations and to enforce a significant number of drivers.
- Most common methods for monitoring:
 - ✓ parked patrol car
 - ✓ moving patrol car
- Use of real and virtual camera devices.

Control vs Infringement Efficiency

Greece	1998	1999	2000	2001	2002	2003	2004
Road Fatalities	2.182	2.116	2.088	1.895	1.654	1.605	1.670
Drink & Drive Controls	202.161	246.611	365.611	710.998	1.034.502	1.271.273	1.281.102
Drink & Drive Infringements	13.996	17.665	30.507	49.464	48.947	45.546	40.986

Principles of Selected Enforcement Programmes

- Intensify enforcement and presence of Traffic Police
- Select appropriate control sites
- Select appropriate control time periods
- **More frequent controls and lower fines**
- Collect fines effectively

Principles of Selected Enforcement Programmes

- Operate Traffic Police with the appropriate personnel
- Traffic Police training in new technologies
- Supply Traffic Police with appropriate devices
- Use smart enforcement systems (e.g. cameras, section control)
- Develop drivers' rehabilitation programmes

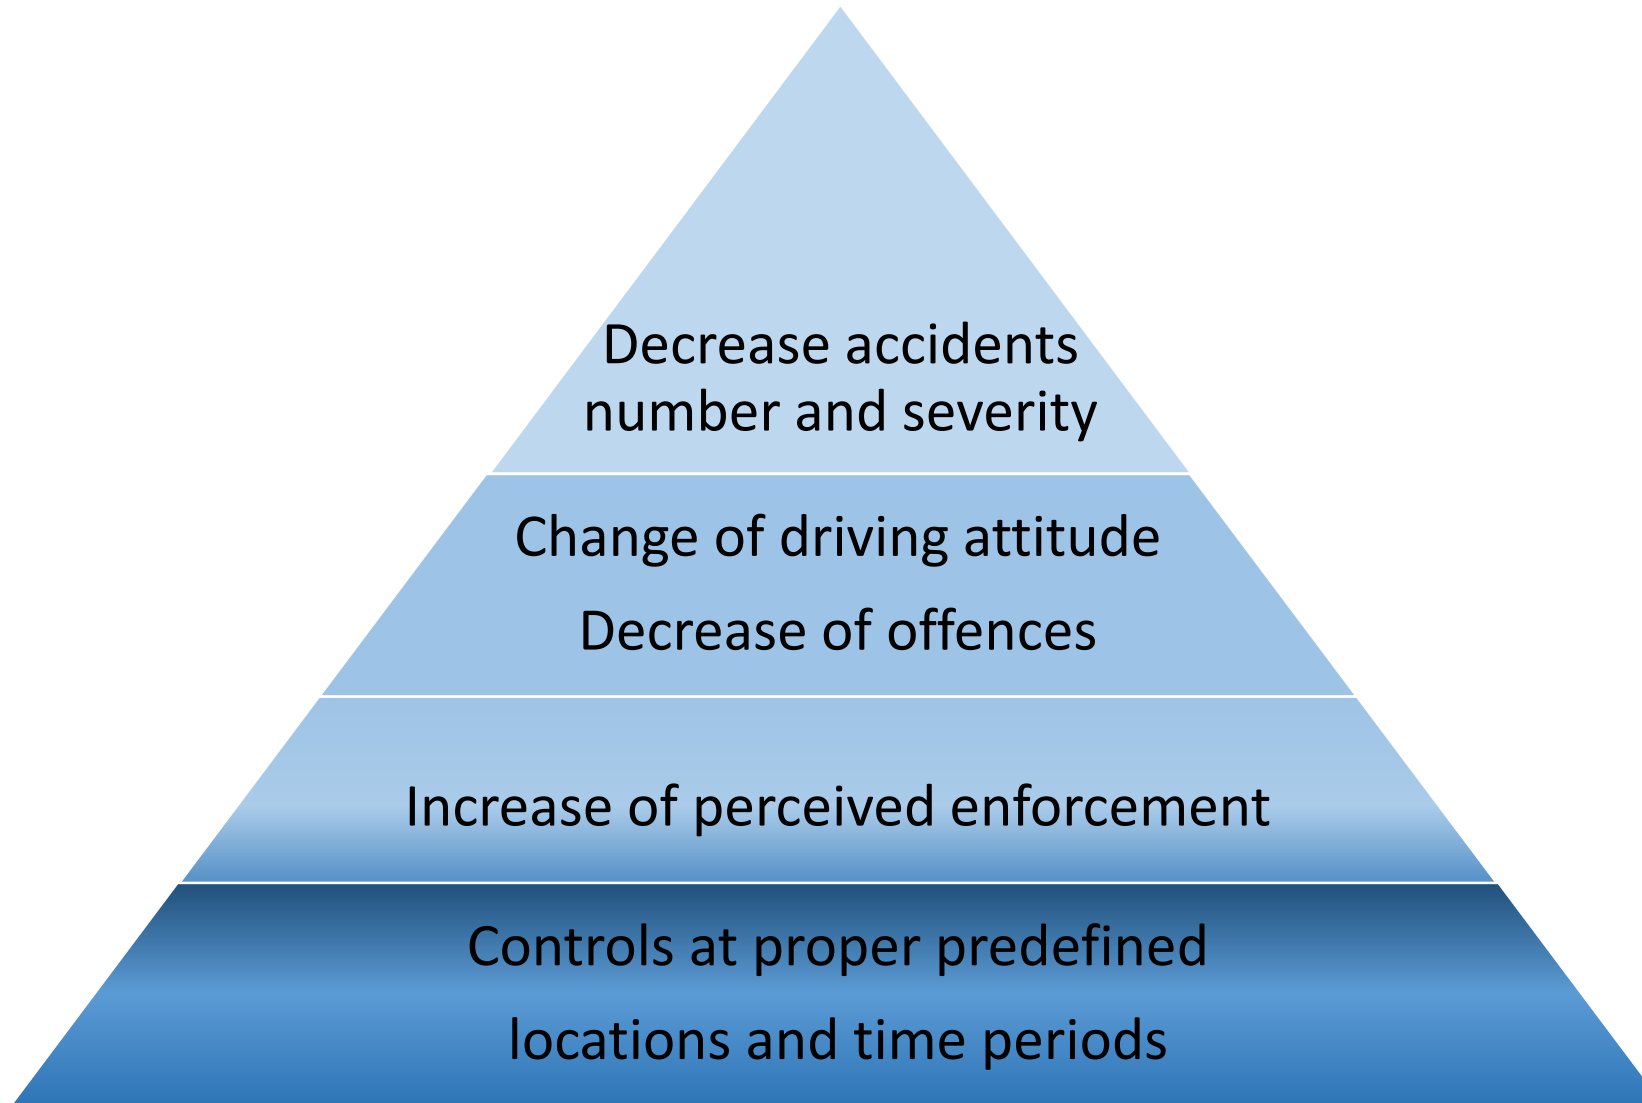

Principles of Selected Enforcement Programmes

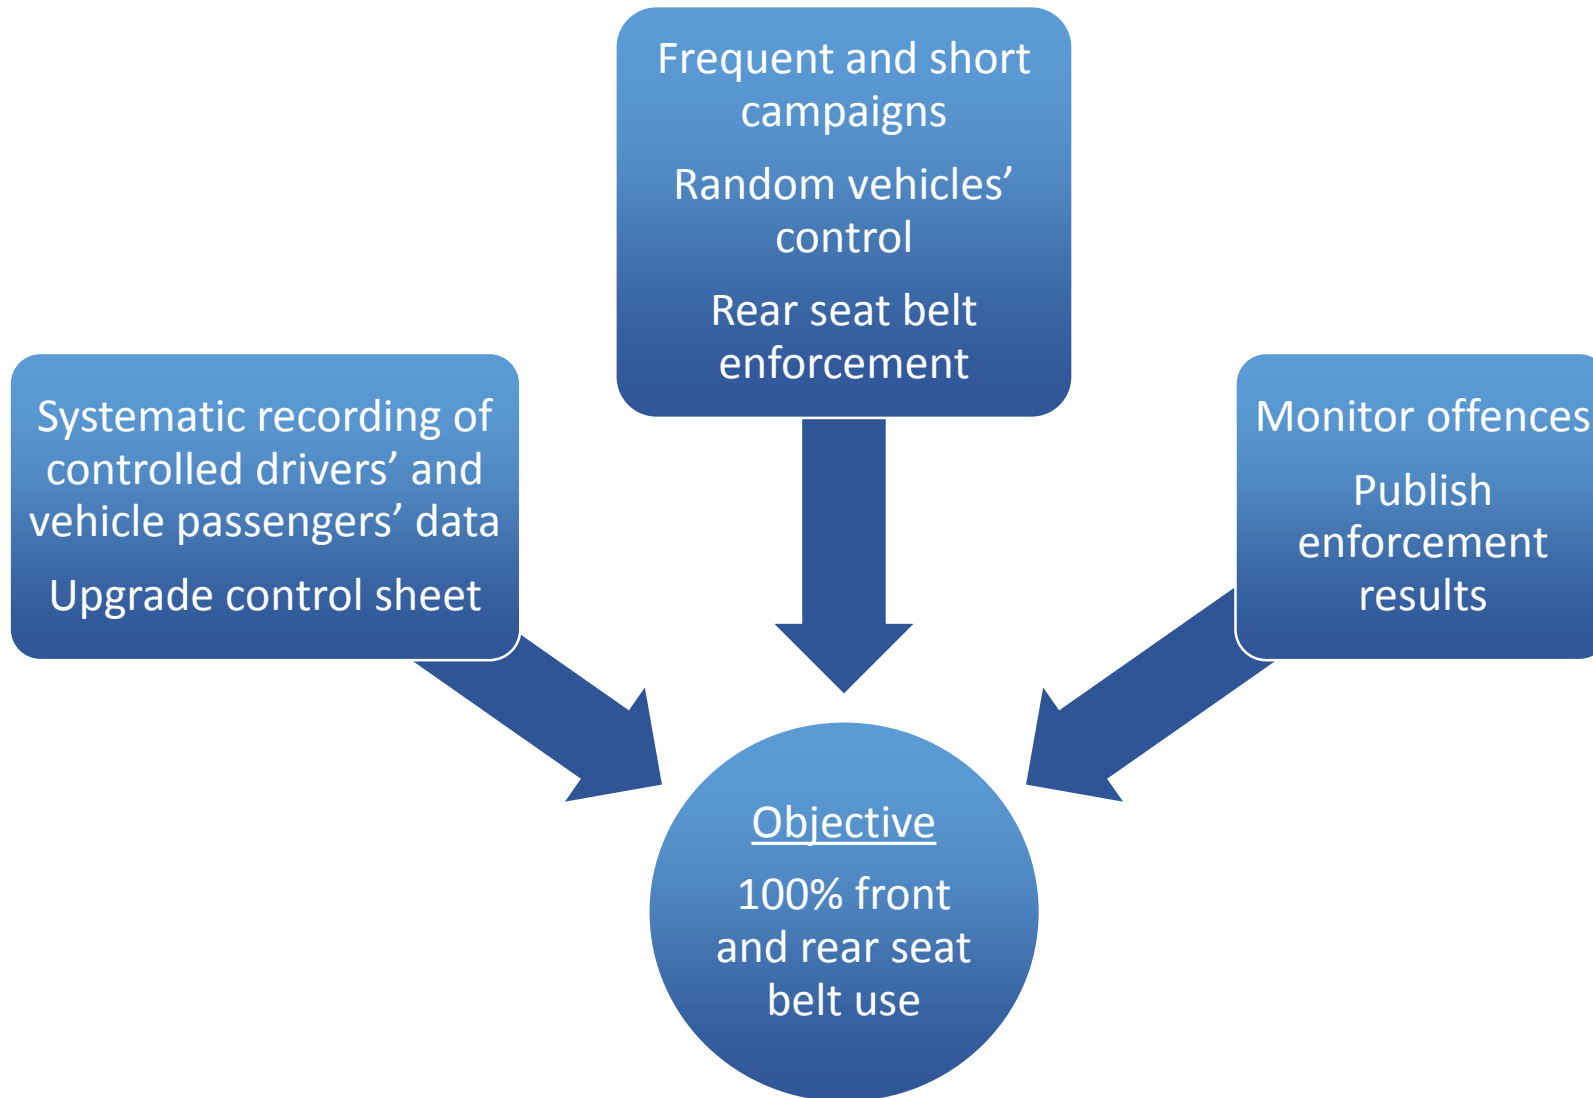

- **Monitor implementation of enforcement activities**
 - Number of traffic controls (speed, alcohol, belt, helmet, etc.)
 - Number of Traffic Police staff performing controls per day, region etc
 - Number of detected offences
 - Number of offences estimated based on surveys, studies etc
- **Monitor road safety level**
 - Number of road accidents, fatalities, injuries
 - Seat belt-helmet use, number of drunk drivers, speeding drivers
 - Number of offences estimated based on surveys, studies, etc
 - Results of random sampling controls
- **Monitor enforcement effectiveness**
 - Measure effectiveness using good-practice methods
 - Effectiveness concerning specific offences, road users, areas etc
 - Identification of effective and non-effective enforcement activities

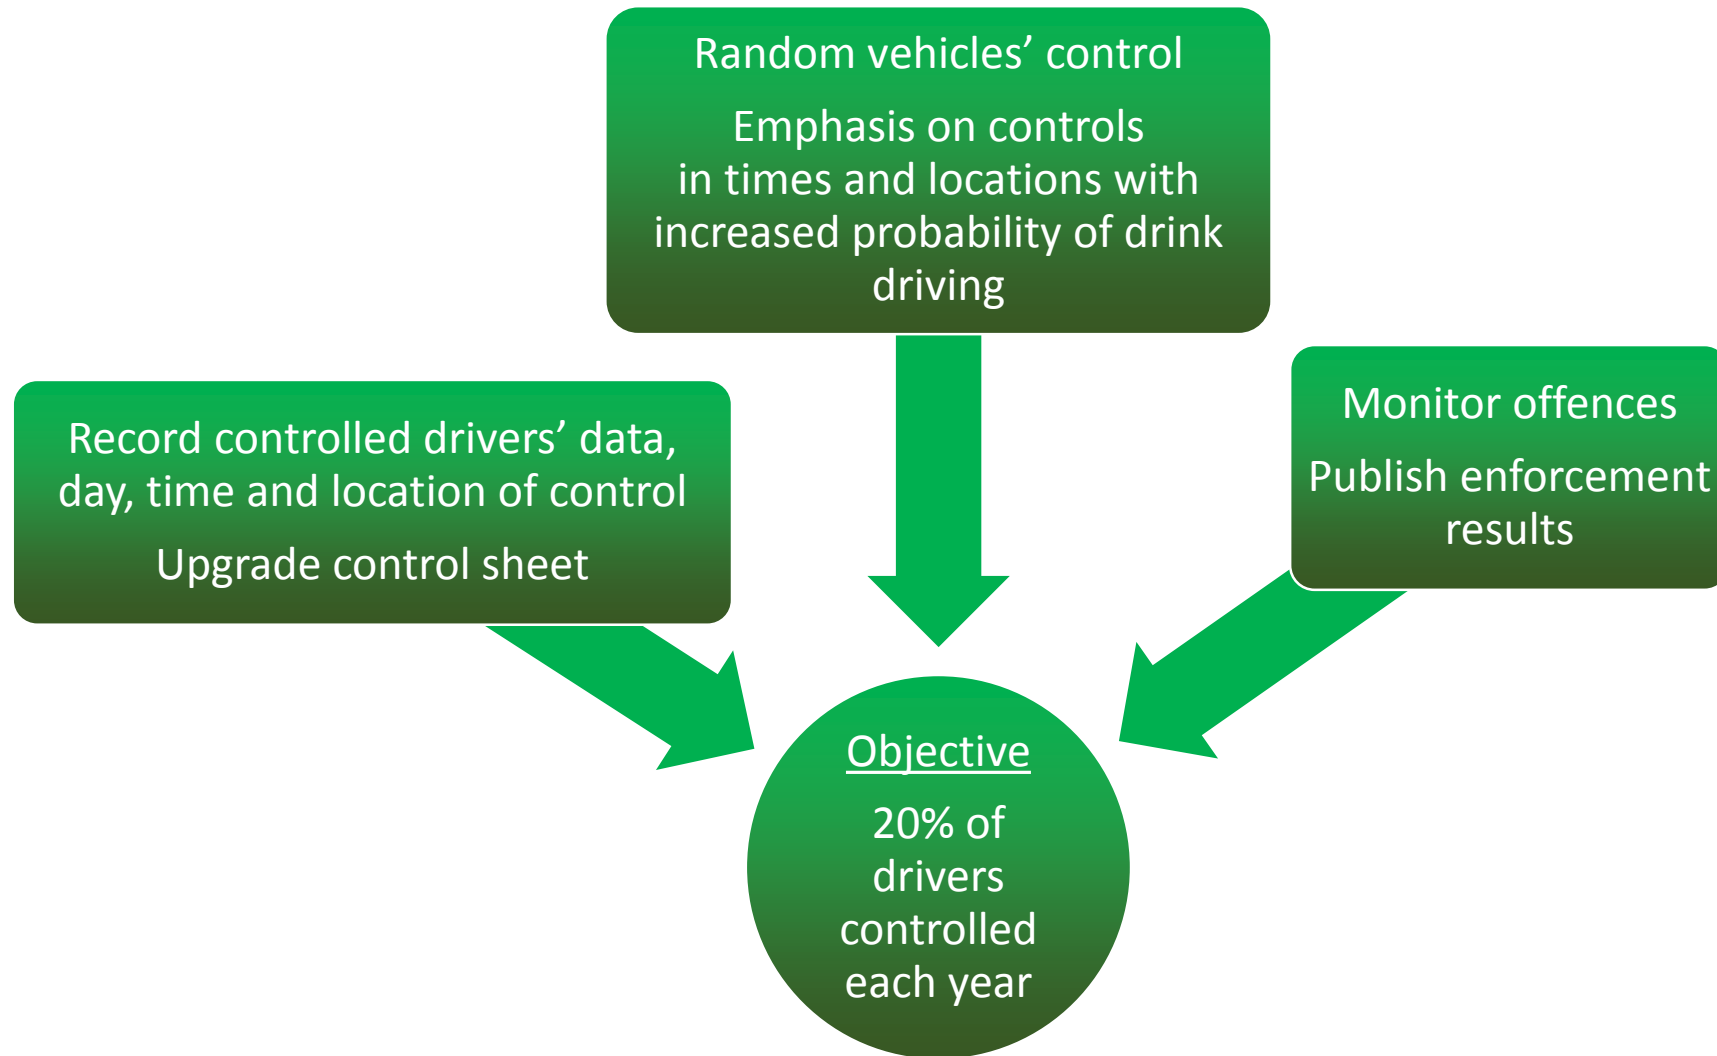

Road Safety Enforcement Programme Objectives

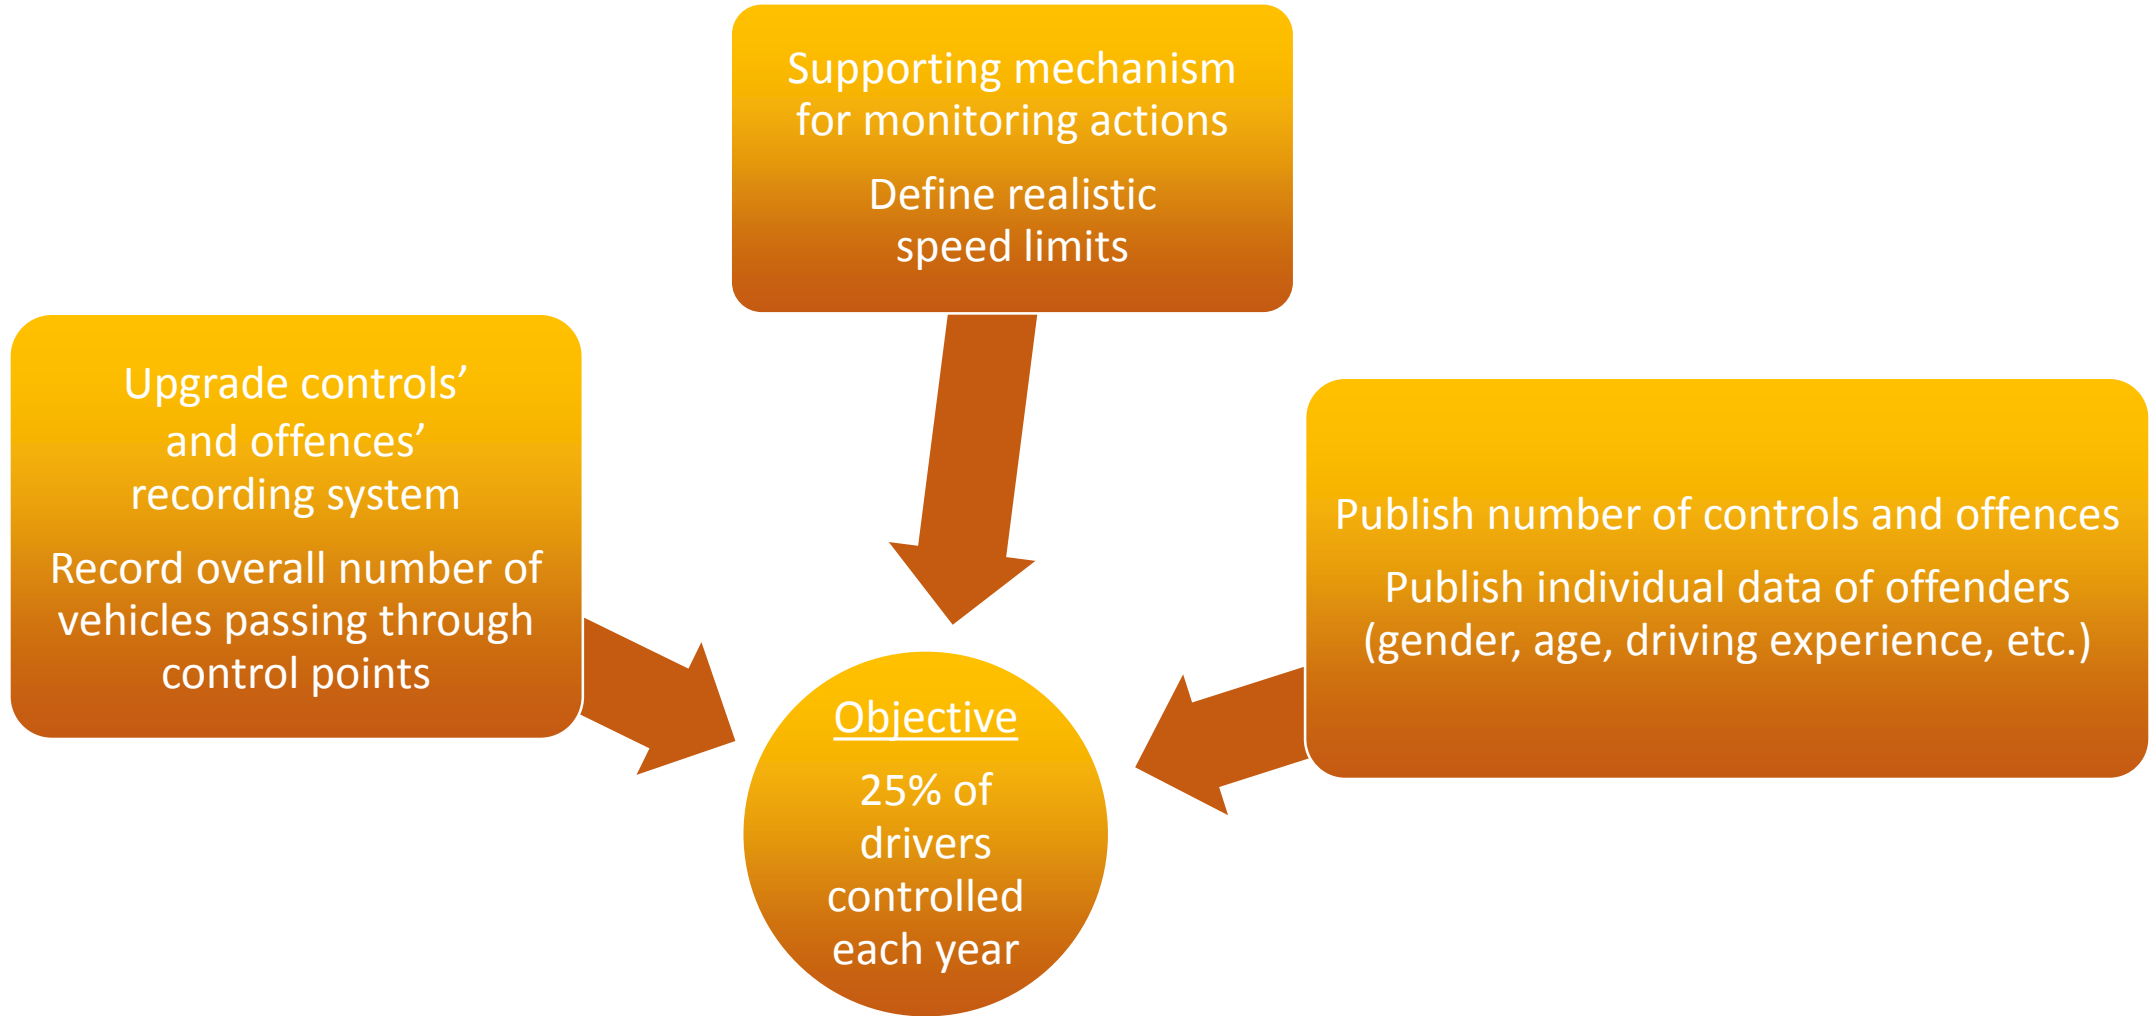

Seat Belt Enforcement Actions

Drink Driving Enforcement Actions

Speeding Enforcement Actions

Conclusions

- A decrease in road accidents number and severity is achieved through the substantial change in driving behaviour and offence reduction.
- Increase of the perceived enforcement is achieved by frequent controls at many sites of the road network focusing on risk locations and hours.

Conclusions

- Effective enforcement programmes are reached through:
 - ✓ increasing intensity of programs
 - ✓ systematic monitoring
(enforcement intensity, offences, driving behaviour)
 - ✓ integrated communication policy
(coordination with other actions, publishing actions and results)
 - ✓ developing conscious safety culture for drivers
(implement remedial programmes for recidivists, adopt point system)

Further Recommendations

- Enforcement should always be combined with the respective campaigns at national and local level.
- Collaboration on a regular basis between Traffic Police and relevant Experts (transportation engineers, communication specialists, psychologists, etc.)
- Publishing on a regular basis of control figures and their results in order to ensure the active commitment and involvement of road safety stakeholders.
- Study the specific features of each enforcement action (residential - non residential areas, time, day, vehicle type, etc.)
