Presentation outline

1. The NTUA Road Safety Observatory (10)
2. Cooperations and Partners (5)
3. NRSO Website and Systems (4)
4. Road Safety Research Areas (6)
5. Road Safety Research Perspectives (4)
A Center of Research and Innovation Excellence on Road Safety, with global recognition [ranked: 2nd in Europe and 6th worldwide (AAP 2018)]

within the Department of Transportation Planning and Engineering [ranked: 9th in Europe and 39th worldwide (ShanghaiRanking’s 2017), scientific citations: 3rd in Europe and 19th worldwide (Pulse 2017)]

of the School of Civil Engineering [ranked: 11th in Europe and 42nd worldwide (QS 2018)]

of the National Technical University of Athens [the oldest (since 1837) and most prestigious Greek Technical University]
NRSO - Mission

The Mission of the NTUA Road Safety Observatory (www.nrso.ntua.gr) is:

• to support the Greek and the International Road Safety Community with current key road safety knowledge and data

• gathered, analysed and organised within the research activities of the Department of Transportation Planning and Engineering of the School of Civil Engineering of the National Technical University of Athens

• as well as within co-operations with various national and international road safety organisations
NRSO - Vision

The Vision of the NTUA Road Safety Observatory is:

• to contribute to the significant reduction of the number of road accidents and of the related casualties in Greece, in Europe and worldwide

• through the scientific support of evidence based decision making for the necessary road safety policies, programmes and measures
NRSO - The People

- Internationally recognized Professors
- 6 Senior Transportation Engineers (4 PostDoc)
- 6 Transportation Engineers - PhD Candidates
- 6 Transportation Engineers - Research Assistants
- 2 Information Systems Engineers
- 2 Administrative Assistants

with high level scientific expertise in:
- traffic safety, transport and traffic planning and engineering
- data science and advanced statistical data analysis
- intelligent transportation systems and automation
NRSO – Our Fundamental Research Principles

**Excellence**
- Advanced and innovative technology concepts

**Impact**
- Research with significant impact to society and economy

**Implementation**
- State-of-the-art organisation and management structures
We are committed to the Value of the Researcher, which:

- starts with carrying out excellent research,
- is tested by publishing in high-level peer review journals and
- makes the difference when awarded project grants through highly competitive procedures
NRSO - Research Performance

- More than 100 road safety research projects since early '90s
  - 40 Greek
  - 60 International

- 71 of these research projects were assigned through highly competitive (national or international) procedures
  - Horizon 2020: 7 projects out of 35 proposals submitted
NRSO - Scientific Publications

More than 500 road safety publications:
- in scientific Journals (more than 150)
- in scientific conference proceedings (more than 350)
- with more than 3,000 citations
- i10-index: google scholar: 83
- h-index: google scholar: 29, scopus: 22

More than 350 presentations in scientific conferences
- more than 250 international and more than 100 national
- after invitation in more than 150 of them

Available on-line at: www.nrso.ntua.gr/geyannis
NRSO - Road Safety PhDs

➢ Dimitris Tselentis, 2018
  ➢ “Benchmarking Driving Efficiency using Data Science Techniques applied on Large-Scale Smartphone Data”

➢ Dimosthenis Pavlou, 2016
  ➢ “Traffic and safety behaviour of drivers with neurological diseases affecting cognitive functions”

➢ Akis Theofilatos, 2015
  ➢ “An advanced multi-faceted statistical analysis of accident probability and severity exploiting high resolution traffic and weather data”

➢ Panagiotis Papantoniou 2015
  ➢ “Risk factors, driver behaviour and accident probability - The case of distracted driving”

➢ Eleonora Papadimitriou 2010
  ➢ “Pedestrian behaviour and safety models in urban road networks”

➢ 9 more PhDs are in progress
NRSO - PhD & PostDoc Alumni Careers

Our PhD and PostDoc Alumni Engineers are pursuing excellent academic, engineering and consulting careers worldwide:

- Technical University of Munich (TUM)
- Technical University of Delft (TUD)
- Ecole Nationale des Ponts et Chaussées (ENPC)
- Ecole Polytechnique Fédérale de Lausanne (EPFL)
- Loughborough University (UL)
- National Technical University of Athens (NTUA)
- Ernst & Young (EY)
- Salfo Engineering International (Salfo)
Cooperations and Partners
Our Cooperations - Greece
Our Cooperations - Europe
Our Cooperations - Worldwide
Our Partners - Universities
Our Partners - Research Institutes

- tøi Institute of Transport Economics
  Norwegian Centre for Transport Research
- SWOV Institute for Road Safety Research
- IFSTTAR
- KFV
  Evonirium für Verkehrssicherheit
- AIT
  Austrian Institute of Technology
- RSA
  Údarads Um Shúbháít seathe Ach Bhórdhir
  Road Safety Authority
- bast
- VAS
  institute
- vti
- VTT
- TRL
  The Future of Transport
- DGT
  Dirección General de Tráfico
- LNEC
  Laboratório Nacional de Engenharia Civil
- ITS
- CDV
  Centrum Dopravního Vyzkumu
- KTI
  Alapítva - Since 1938
- JAVNA AGENCIJA REPUBLIKE SLOVENIJE
  ZA VARNOST PROMETA
- bfu
- LAB
- ceesar
- DEKRA
  Alles im grünen Bereich.
- TNO
  Innovation for life
- ICES
NRSO Website and Systems
The NRSO website (1/2)

An international reference website - information system with state-of-the-art road safety data and knowledge

www.nrso.ntua.gr

- more than 3,000 visits per month
- 95 electronic newsletters since 2007
- tens of tweets and social media posts annually
- network of more than 3,000+ road safety experts in Greece (800+) and worldwide (2,200+)
The NRSO website (2/2)

A dynamic website with a wealth of information

www.nrso.ntua.gr

- since 2004 with more than 1,300 items
- all important road safety News in Greece, in Europe and globally
- new Reports covering all modern road safety issues
- latest available road safety Data for Greece and the EU
- exhaustive list of road safety Conferences in Greece and globally
- links to dozens of road safety Resources globally
NRSO Data and Knowledge Systems

Databases
- **SANTRA** - Greek Road Accident Database with disaggregated data (1985 - 2017, 1,2 million recordings)
- **CARE** - European Road Accident Database with disaggregated data (1991 - 2017, 36 million recordings)
- **IRTAD** - International Road Accident Database with aggregated data
- Databases of **International Organisations** (WHO, IRF, ERF, UITP)
- Databases with **Aggregated Data** (Vehicle fleet, veh-km, driver behavior, etc.)

Knowledge Systems
- Digital Road Safety **Library** > 5,000 key Road Safety Reports
- International **Bibliography** databases (scopus, science direct)
- Analysis **tools** (traffic, simulation, statistics)
NRSO Research Infrastructure

- **Driving Simulator** (Foerst ¼ cab, moving base) for driver behavior experiments
- Unmanned Aerial Vehicles (**Drones**) for traffic monitoring
- Smartphone **Telematics** application (powered by OSeven) for driver behaviour monitoring
- On-Board Diagnostics Devices (**OBD**) for driver behavior monitoring
- **Cameras** and other devices for traffic counts, speed monitoring, position monitoring (GPS)
Road Safety Research Areas
The Road Safety Research Areas

- Road Safety Data & Knowledge Systems
- Driver Safety Behaviour
- Road Infrastructure Safety
- Driver Behaviour Telematics
- Traffic Automation and Safety

George Yannis, The NTUA Road Safety Observatory - NRSO
Road Safety Systems

- **Nrso** - The NTUA Road Safety Observatory
- **Erso+** - The European Road Safety Observatory
- **SaferAfrica** - The African Road Safety Observatory
- **SafetyCube** - European Road Safety Decision Support System
- **SafeFITS** - Global Road Safety Model
- **Pract** - The CEDR Road Safety APM and CMF Repository
- **BeOpen** - Open science in road safety
- **RscKsa** - The road safety data center of Saudi Arabia
Driver Safety Behaviour

- **Esra** - Road safety attitudes in Europe
- **SafeCulture** - Road safety culture in Greece and in Norway
- **OSeven** - Monitoring driver behaviour through mobile phones
- **Velivr** - Cycling under the influence of alcohol and drugs
- **Skillful** - Safety skills of future transportation professionals
- **SafeBehave** - Actions to improve drivers' safety behavior
Road Infrastructure Safety

- **i-safemodels** - Modelling crash modification factors globally
- **EibCba** - Economic analysis of road infrastructure safety projects
- **Pract** - The CEDR Road Safety APM and CMF Repository
- **e-mopoli** - Safety implications from electromobility
- **CampSump** - Mobility and safety in University Campuses
- **WeatherSafe** - Predicting road accidents with real time data
Driver Behaviour Telematics

- **i-Dreams** - Driver-vehicle-environment interactions and safety tolerance
- **BeSmart** - Smartphone applications for driver safety behaviour support
- **Sesame** - Smartphone exploitation for event spatial analysis & mapping
- **OSeven** - Data science techniques for benchmarking driving efficiency
Traffic Automation and Safety

- **Drive2theFuture** - Driver needs and behaviour in automated traffic
- **Levitate** - Societal impacts of connected and automated vehicles
- **Show** - Shared Automation Operating Models for Worldwide Adoption
- **Hadrian** - Holistic Approach for Driver Role Integration and Automation Allocation for European Mobility Needs
Overall Key Road Safety Remarks

- **Speed** is highly misunderstood by all

- **Vulnerable road users** are not accommodated

- We spend too much without effectiveness monitoring

- Unrealistic expectations of technology (especially of automated vehicles)

- Too much **data**, too little usage

- Need for more road safety **science and budgets**
Road Safety Policy Perspectives

Focus on the **key road accident risk factors:**
- Speed, Speed and Speed
- Drink and Drive
- Distracted Driving
- Not using seat belt and helmet

Adapt **urban mobility management** to accommodate and balance current and future mobility and safety needs of the vulnerable road users (pedestrians, cyclists, motorcyclists): Reduce Speed everywhere.

Develop strong **road safety culture** of the Authorities and all Stakeholders (safe system approach) and the whole population.
Road Safety Technology Perspectives

- **Digitalization** opens great new data possibilities for:
  - road user support and guidance
  - evidence based public and private road safety decision making at all levels

- New great potential for seamless **data driven procedures** from safety problems identification to selection and implementation of optimal solutions

- Exploitation of the high safety potential of **vehicle and traffic automation**, with focused research on the transition phase and the vulnerable road users
NTUA and ETSC

- A long standing cooperation further officialised.

- Support ETSC with scientific evidence for:
  - clear problem analyses
  - choosing optimum solutions

- Highlight the great need for:
  - more data and knowledge
  - high end analysis of current and future data
  - better exploitation of digital era potential

- Further contribute at the ETSC Network
  - close cooperation with all ETSC Members
  - exploit ETSC road safety support in Greece
  - work together for vision zero in Europe and globally
The NTUA Road Safety Observatory

George Yannis
Professor
Brussels, 10 October 2019
