Overview of the SafetyCube project: Towards a European Road Safety Decision Support System

George Yannis, Eleonora Papadimitriou, Athanasios Theofilatos, Apostolos Ziaiopoulos, Pete Thomas, Ashleigh Filtness

Larissa, 11-12 October 2018
Current Road Safety DSS Worldwide

- Crash Modification Factors Clearinghouse (www.cmfclearinghouse.org) by NHTSA (USA) - **6,251 CMF** on infrastructure only - ongoing
- Road Safety Engineering Kit (www.engtoolkit.com.au) by Austroads (Australia) - **67 treatments** on infrastructure only
- PRACT Repository (www.pract-repository.eu) by CEDR (Europe) - **889 CMF and 273 APM** on infrastructure only - high quality
- iRAP toolkit (http://toolkit.irap.org/) by iRAP - **58 treatments** - (42 on infrastructure)
- Safety Performance Factors Clearinghouse (http://spftool.com/) by Tatum Group LLC, - **few SPF** - subscribers only
SafetyCube Methodology

1. Creating **taxonomies** of risk factors and measures
2. Exhaustive **literature review** & rigorous study selection criteria
3. Use of a template for **coding studies**, to be introduced in the DSS back-end database
4. Carrying out **meta-analyses** to estimate the effects of risk factors /measures.
5. Drafting **Synopses** summarising results of risk factors/measures.
6. Carrying out **cost-benefit analyses** for the most effective measures

- **Systems approach**: links between infrastructure, user and vehicle risks
- Rigorous assessment of the **quality of the data/study methods**
SafetyCube Taxonomies

Three-level taxonomies
Separately for risks and measures

- **4 Categories**
  road user, infrastructure, vehicle, post impact care

- **38 risks, 50 measures (88 in total)**
  e.g. distraction, roadside, crashworthiness

- **120 specific risks, 193 specific measures (313 in total)**
  e.g. mobile phone use, no clear-zone, low pedestrian rating (NCAP)
Selection and Coding of Studies

Study search in key databases
(Scopus, TRID, Elsevier, Taylor & Francis, Springer etc.)

Study selection and prioritization criteria
- Studies with quantitative results
- Meta-analyses, or other high quality studies (peer-reviewed)
- Recent studies
- European studies

Study reporting criteria
- Study design and methodology
- Results and their confidence intervals
- Study limitations
SafetyCube DSS Design Principles

- A **Modern** web-based tool
- Highly **Ergonomic** interface
- **Simple** structure
- Powerful **Search Engines**
- Fully **Documented** information
- Easily **Updated**
SafetyCube DSS Search Engine

**Fully linked search**
- search a road safety problem alone or through the measures
- search a measure alone or through the road safety problems
- search for risks and measures related to specific road user groups or crash types (accident categories)

**Fully detailed search**
- search by any parameter in each data table in the database

**Fully flexible search**
- adjust and customize search according to results

**Fully documented search**
- access background information at any stage (supporting documentation, links, etc.)
G. Yannis et al., Overview of the SafetyCube project: Towards a European Road Safety Decision Support System
The Search Structure

- **Search**
  (5 entry points)

- **Results pages**
  (Introduction, Colour codes, Synopses, Coded studies)

- **Individual Studies** pages
  (Disaggregate level, detailed effects listed, some studies not in synopses)

- **Links** between Risk Factors
  Information about which risks can be remedied by which types of measures
SafetyCube DSS Entry Points

- **Keyword search**
  (all database keywords)

- **Risk factor search**
  (taxonomy)

- **Measures search**
  (taxonomy)

- **Road User Groups**
  (database keywords related to each group)

- **Accident Categories**
  (inquiries about specific scenarios)
SafetyCube DSS Results Pages

**Search results**
- Synopses, and their short summaries & colour codes
- Table listing the available studies

**Refine search**
- Specific Risk factor / Measure
- Other **search filters:**
  - Road user groups: All, car occupants, drivers, passengers, PTW riders, pedestrians, cyclists, HGVs.
  - Road types: All, motorways, rural roads, urban roads

**Links to related measures**
- Select a specific risk factor / measure
- Get the list of related measures
SafetyCube Synopses

215 Syntheses on risk factors / measures

Summary (2 pages)
- Effect of risk factor / measure and ranking (colour code)
- Risk / safety effect mechanisms
- Risk / safety effects size, transferability of effects

Scientific overview (4-5 pages)
- Comparative analysis of available studies
- Analysis results:
  Meta-analysis/Vote-count analysis/Qualitative analysis

Supporting document (3-10 pages)
- Literature search strategy & study selection criteria
- Detailed analyses
SafetyCube Related Risks / Measures

- Linking based on a dedicated model categorizing risks

- Risk Factors (118) are linked to one or more Road Safety Measure(s) (167)*

- A total of 762 links between risk factors and measures

* A few risk factors or measures (e.g. post-impact care) were not “linkable.”
SafetyCube DSS Individual Study Pages

Title, author, source, abstract
- Link to URL for full-text download (depending on Institute permissions)

Study design info:
- Country
- Research Method, Design, Sample
- Exposure/Control group
- Risk/Outcome Group
- Modifying Conditions
- Potential limitations

Study results:
- Table listing the detailed effects reported in the study
SafetyCube DSS Calculator (1/2)

- Combines information about the **effectiveness of a measure** (i.e. the percentage of crashes or casualties prevented) with the **costs** of this measure.
- Integrates updated information of **crash costs in the European countries**
- Allows to express all costs and benefits of a measure in monetary values and conduct **cost benefit analysis**.

**Main Functions**
- Perform cost-benefit analysis with **own input data**.
- Select one of the **SafetyCube examples** of cost benefit analyses
  - Measures with high effectiveness
  - For which reliable cost information could be found
SafetyCube DSS Calculator (2/2)

- **Economic Efficiency Evaluation Tool (E3)**
- Fully integrated in the DSS
- Enables users to create their custom CBA “My Measure” function with free input on:
  - Country, years of analyses
  - Basis: Crashes or Casualties
  - Costs (implementation and annual)
  - Measure effectiveness (per severity category)
  - Penetration rate and side effects
- Contains SafetyCube example CBAs on:
  - Behaviour (12 examples)
  - Infrastructure (19 examples)
  - Vehicle systems (4 examples)
  - Post-impact care (1 example)
SafetyCube DSS Knowledge Wealth

**SafetyCube DSS** contains:
- more than 1,250 **studies**, 
- with more than 7,500 **estimates** of risks/measure effects on:
  - behaviour, 
  - infrastructure, 
  - vehicle, and 
  - post impact care 

- **215 Synopses**
- **37 cost-benefit analyses** (adjustable)
Example questions addressed

- how important is my road safety problem?
- who else is having similar problems?
- what solutions are usually proposed for my problem?
- how efficient are the solutions proposed?
- which is the most efficient solution?
- and if I have a combination of problems...

...then use SafetyCube DSS to have the answers
SafetyCube Next Steps

- SafetyCube DSS is open (October 2017): https://www.roadsafety-dss.eu
- The future operation of the SafetyCube DSS concerns:

1. the uninterrupted operation of the current SafetyCube DSS
2. updates of the risk factors, measures and cost-benefit analyses (recent studies but also older ones)
3. addition of studies in more languages
4. translation of the contents in other languages
5. possibility to receive, check and incorporate studies submitted by external experts and organizations and the respective quality control
6. incorporation of additional data & knowledge sections
Delivering a long waited powerful tool

- SafetyCube DSS is the first integrated road safety support system **developed in Europe**

- SafetyCube DSS **offers for the first time** scientific evidence on:
  - risks and not only measures
  - risks and measures not only on infrastructure
  - a very large number of estimates of risks and measures effects
  - links between risks factors and measures

- SafetyCube DSS aims to be **a reference system** for road safety in Europe, constantly improved and enhanced
