**13<sup>th</sup> RSLC International Conference** is one in a row of events organized within the Decade of Action for Road Safety, 2011-2020, launched by the United Nations General Assembly in its resolution 64/255 of Improvement of Road Safety (10 May 2010.). World Health Organization has prepared a Global Plan for Decade of Action for Road Safety, 2011-2020. Conference represents an opportunity to learn about the latest work of eminent experts, from Europe and abroad, and especially of those from the region, as well as to get informed about practical experiences in meeting the challenges of risk in traffic. Results of traditional researches of traffic risk will be shown and also risk distribution across local communities in Serbia, as well as similar studies from other countries. Great attention will be devoted to showing the practice of implementing the measures and the activities of local communities, which will once again point out their significance and their role in improving road safety. The meeting represents an opportunity for comparative analysis of different models of organization and functioning of the road safety protective system in the local community, as well as models of funding road safety activities at the local level.
