

NEEDS, WANTS AND BEHAVIOUR OF “DRIVERS” AND AUTOMATED VEHICLE USERS TODAY AND INTO THE FUTURE

Drive2theFuture is a European research project (<http://www.drive2thefuture.eu/>) that aims to prepare “drivers”, travellers and vehicle operators of the future to accept and use connected, cooperative and automated transport modes and the industry of these technologies to understand and meet their needs and wants.

The purpose of the survey is to explore your **opinions about an acceptance of** Autonomous Vehicles for different transport modes and with your participation you will help us understand your traveling preferences better!

The survey is structured in a modular way of four main areas corresponding to each transport domain (aviation, maritime, rail, road) and every section includes *a simple description of what automation means* for each mode, with simple illustrative examples and *a short list of multiple choice questions*.

The survey is available in several languages and you may find it in the link below:

<http://www.drive2thefuture.eu/dissemination/presentations-publications-and-papers/>

and in the following QR-Code:

All the information collected will be treated as **anonymous and confidential** by the researchers.

Your feedback is valuable for us! Thank you in advance for your participation!

The survey will be active until 24th February 2020

Drive2theFuture Consortium
